

NVS Technologies AG recently launched the L1 RTK GNSS receiver on the market: precise positioning is now affordable for a variety of applications only at a fraction of the market price.

Features:

- Integrated RTK functionality
- L1 GPS, GLONASS and SBAS
- Base and Rover mode
- Enhanced RAIM for 3D and RTK modes
- Up to 20Hz update rate

- Intergrated MEMS-sensors
- PPS output and Event input

Benefits:

- Compact design combined with uncompromised performance
- Low power consumption
- Easy integration
- Available for a faction of the market price

The modules and evaluation kits are available from stock.
